Get ready to upgrade your Harley Davidson motorcycle with a Boom! Audio Cruiser Amp & Speaker Kit installation tutorial video. This comprehensive guide covers all models, years, and makes of Harleys, so you can save money by doing it yourself in your garage or on your patio. No fancy equipment is needed; just basic tools and a willingness to learn. The video provides thorough instructions, including wiring options (solder or butt connectors), wire management, and component explanations. You'll also learn how to tie into a power source and choose the right kit for your Harley's year and model. Unlike the poor paper instructions provided by Harley Davidson, this tutorial breaks down each step in detail, making it easy to follow along. The video is shot in high definition, allowing you to feel like you're right there with the experts. As bikers for bikers, we provide a unique perspective on this project. You'll even learn how to mount your music device to your handlebars or control cluster using Biker Gripper smartphone/music player mounts. So, get started today and take pride in completing your own projects! This tutorial video is suitable for Harley Davidson touring models from 2014 to 2023 with batwing or shark nose fairings and equipped with the Harley-Davidson Boom! Box Infotainment System. It covers the installation of Harley-Davison brand Boom Audio Stage 1 or 2 front amp & speakers, as well as setting up the separate wire harness for potential future additions. You can avoid wasting time and money by doing the Harley-Davidson Boom Audio amp and speaker kit installation yourself in your garage or on a patio. No special tools are required, just follow the step-by-step video tutorial that explains each component's function and provides guidance on wiring management. The video is shot in high definition with clear explanations from experienced bikers, making it easy to understand and replicate. By doing it yourself, you'll save money and have the satisfaction of completing your own project without relying on a mechanic. To get started, watch the tutorial video now and don't forget to mount your MP3 player securely using a Biker Gripper for optimal enjoyment of your new audio system.
